SUMMARY

Software Engineer specializing in backend development with .NET technologies, focusing on building robust, scalable, and secure applications.

Over two years of experience in designing and implementing backend solutions tailored to business needs while ensuring high performance, maintainability, and quality in every project.

Committed to contributing to development projects and eager to learn from experienced peers in a collaborative team setting.

TECHNICAL SKILLS

- **Back-End:** C#, ASP.NET Core (Web API | MVC), Identity, Entity Framework Core, ADO.NET, Dapper, LINQ, Minimal APIs, Performance (Caching, Rate Limiting, Compression), API Versioning, OpenAPI, Observability, Background Services, Windows Services,
- **Database:** SQL, Microsoft SQL Server, T-SQL, Database Design, PostgreSQL.
- **Front-End:** JavaScript, Windows Forms, HTML5, CSS3, Bootstrap, Responsive Web Design.
- **Architecture & Design:** SOLID Principles, Design Patterns, N-Tier Architecture, Clean Architecture, CQRS, Repository Pattern, Unit of Work.
- **Software Testing:** Unit Testing (xUnit, MSTest).
- **DevOps:** Dockerization & Orchestration, CI Pipeline with GitHub Actions, Central Package Management.
- **Version Control & Tools:** Git, GitHub, Postman, Swagger, Scalar.
- **Soft Skills:** Team Collaboration, Problem Solving, Communication, Time Management.

PROFESSIONAL EXPERIENCE

- Interactive Training Platform | Ministry of Endowments January 2026 - Present

Developed the backend for a full-featured e-learning platform covering the entire training lifecycle: course, module, and lesson management; enrollment with a gated learning path; auto-graded quizzes, final exams, and prerequisite tests; live sessions via BigBlueButton with attendance tracking and recorded catch-up; and issues tamper-evident, digitally signed PDF certificates featuring QR-code public verification, revocation, and reissue-with-history. It also supports external project evaluation with score-driven approval Built with Clean Architecture and CQRS for maintainability, security, and scalability.

Technologies: ASP.NET Core, Clean Architecture, CQRS & MediatR, EF Core, PostgreSQL, JWT & Identity, BigBlueButton, Bunny Stream, Docker, Testing (xUnit).

- Freelance Backend Developer | [Buffets Management](#) March 2025 - Sep 2025

Developed the backend for a buffet management system that covers the full cycle of buffet operations. Features include product management (categories, details, and pricing), inventory and supply tracking, and real-time stock updates, and customer order handling with status updates and notifications. Implemented user roles (owner, staff, customer) with tailored functionalities and admin dashboards for monitoring requests and staff preparation. The system also generates detailed reports on sales, expenses, and spoilage, with export options in Excel and PDF.

Technologies: ASP.NET Core, Microsoft SQL Server, Entity Framework Core, Identity.

PROJECTS

- [Mechanic Shop Management System](#)

Nov 2025 – Feb 2026

A full-featured mechanic shop management system to streamline daily workshop operations. Manages customers, vehicles, work orders, repair tasks, and billing in a modular, scalable architecture. It includes advanced features such as invoice generation (PDF exports), and real-time dashboard statistics for ongoing work orders and daily performance. Designed using Clean Architecture with CQRS and MediatR for maintainability and scalability.

Technologies: ASP.NET Core (API, Blazor), EF Core, SQL Server, Clean Architecture, CQRS, Docker, Testing.

- [Facebook Web Application](#)

Sep 2024 – March 2025

A fully functional social media platform inspired by Facebook, featuring user authentication, profile management, posts, comments, likes, and an activity log. Enhanced with advanced features such as email confirmation, account recovery, and secure token refresh for user session continuity to improve security and user experience, mimicking core Facebook functionality while ensuring data security, scalability, and smooth performance.

Technologies: ASP.NET Core, Microsoft SQL Server, JavaScript, Entity Framework Core.

- [Bank System](#)

May 2024 - Jun 2024

A comprehensive web application to efficiently manage banking operations. Features real-time dashboards for tracking clients, transfers, and currencies. Users can manage client information, perform deposits, withdrawals, and transfers, and view transfer histories. The project highlights essential banking functionality with a focus on simplicity and user-friendly design.

Technologies: ASP.NET Core, Microsoft SQL Server, JavaScript, Entity Framework Core.

- [Hotel Management System](#)

Mar 2024 - Apr 2024

A hotel management system to efficiently manage hotel operations. Key features include managing guests, room types, rooms, reservations, bookings, and services. Handles guest check-ins and check-outs smoothly while allowing services to be added during a guest's stay. Users can manage reservations with detailed information on guests, room numbers, types, costs, and reservation statuses.

Technologies: Windows Forms, Microsoft SQL Server, Entity Framework Core.

- [Clinic Management System](#)

Nov 2023 - Dec 2023

A clinic management system that simplifies daily operations by providing comprehensive functionality for managing appointments, sessions, patients, doctors, services, and medications. Key features include patient registration, appointment scheduling, real-time appointment tracking, and session management to ensure smooth clinic workflows.

Technologies: Windows Forms, Microsoft SQL Server, ADO.NET.

- [Driving Licenses Management](#)

Sep 2023 - Oct 2023

A comprehensive system to handle all aspects of issuing and managing driving licenses, including first-time issuance, renewal, replacement for lost or damaged licenses, international license issuance, and releasing detained licenses. Manages license categories, applicants' personal details, and compliance with age and testing requirements. Also offers administrative functionality for managing users, license categories, request statuses, and testing results.

Technologies: Windows Forms, Microsoft SQL Server, ADO.NET.

EDUCATION

Bachelor's in Software Engineering | Damascus University, Syria

Sep 2021 - Aug 2026

LANGUAGES

- Arabic: Native.
- English: Intermediate.

PERSONAL INFORMATION

- Date of birth: 17 September 2003.
